

1151 Bay Blvd Ste D Chula Vista, CA 91911

EXHAUST OVERHEAT ALARM

Monitors Wet Exhaust Temperature

- Sends a signal to the warning panel, lighting the red light and sounding the audible alarm if wet exhaust temperature exceeds 200° F.
- Green **POWER ON** light. Bright **RED** warning light. Loud audible buzzer.
- Adjustable aluminum band fits 2" to 8" . Easily installed with locking buckle.
- Five feet of Marine Grade Tinned wire
- Prevents costly engine damage due to overheating
- Overheat detector can be used with other panels and audible devices
